# How to Import Demo Data

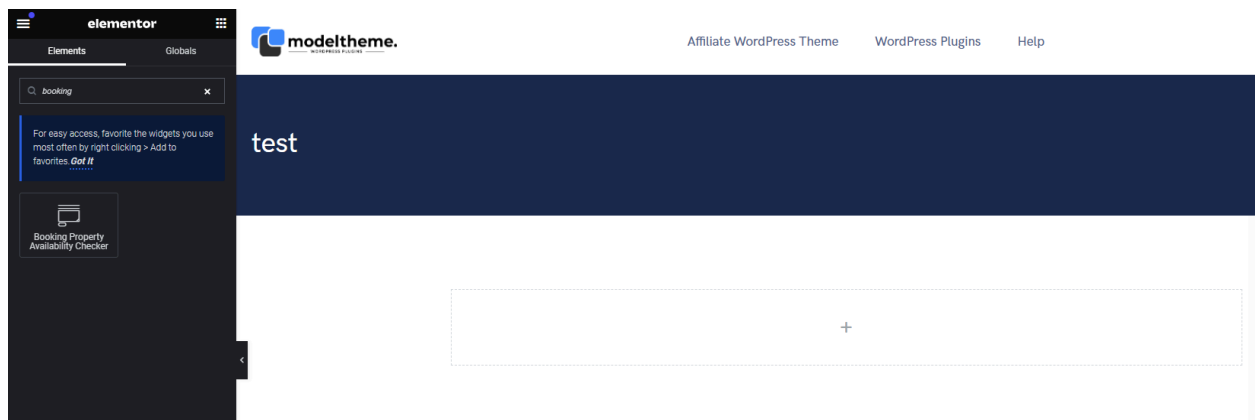

---

1. Login to your WordPress
2. Go to Dashboard > Tools > Import > WordPress
3. Import the xml provided into the downloaded package from themeforest in `plugin_package/demo/data/content.xml`

## Usage (Elementor)

---

The plugin has no settings panel. It is plug-and-play. Simply go to your Elementor Editor and search for the “Booking Property Availability Checker” widget.

Select your form action URL, number of guests and customize the text and color of the button + hover.

The screenshot displays the 'Edit Booking Property Availability Checker' settings panel on the left side of the website. The panel is divided into 'General Options' and 'Style Options'. Under 'General Options', there are fields for 'Version' (set to 'v1'), 'Property Link' (with a 'Write with AI' button and the URL 'https://www.booking.com/hotel/ro/campeador-i'), 'Max Guests' (set to '2'), 'Title' (set to 'Find your property'), 'Submit Button Label' (set to 'Submit'), and 'Powered By' (set to 'on'). The 'Style Options' section includes a 'Need Help' link. The main content area of the website shows a dark blue header with the word 'test' and a white form titled 'Find your property'. The form has fields for 'Check In' (with example 'eg: yy-mm-dd'), 'Check Out' (with example 'eg: yy-mm-dd'), 'Adults' (with example 'Age 13+'), 'Children' (with example 'Ages 2-12'), and 'Rooms' (with example 'Number of rooms'). A blue 'Submit' button is at the bottom of the form, and it is noted as 'Powered by Booking.com'.

## How to get Property Link

To get property Link -> go to your property -> copy property link (example: <https://www.booking.com/hotel/ro/campeador-inn.ro.html>)

## Usage (As Shortcode)

The forms can also be added in any text widget or shortcode block or used with the `do_shortcode()` function on any page template.
