

OpenTable Restaurant Reservation Forms

Elementor Widget

Designed exclusively for OpenTable restaurant owners, this powerful plugin is a game-changer in enhancing your online visibility and driving more traffic to your website. Streamlining the reservation process, our plugin seamlessly integrates with OpenTable, providing a hassle-free experience for both restaurant owners and their valued patrons.

Key Features

- Effortlessly connect your restaurant's reservation system with OpenTable for a smooth booking experience.
- Tailor reservation forms to match your restaurant's branding and ambiance.
- Quickly install and set up the plugin without extensive technical knowledge.
- Provide a simple and intuitive reservation process for customers.
- Compatible with Elementor.
- Fully translatable into any language.

Plugin Installation

- Log into your WordPress dashboard
- Navigate to **Plugins > Add New**

- Click on the "Upload Plugin" button and select **opentable-restaurant-reservation-form.zip**
- Click Install Now
- Click Activate

Usage (Elementor)

The plugin has no settings panel. It is plug-and-play. Go to your Elementor Editor and search for the "OpenTable Restaurant Reservation Form" widget.

Select your form action URL, add your restaurant link and customize the text and color of the button.

Usage (As Shortcode)

The forms can also be added in any text widget or shortcode block or used with the `do_shortcode()` function on any page template.

```
[orrf-builder-shortcode action_id="111100"
action_url="https://www.opentable.com/gaucho-piccadilly" color="#ffffff"
color_hover="#ddd" bg_color="#DA3743" bg_color_hover="#B8222D"
submit_button_label="Find a Time" heading="Make a reservation"
select="action_url"][/orrf-builder-shortcode]
```

Parameters:

Param Name	Param Type	Example	Available Options
action_id	integer	111100	OpenTable Property ID
action_url	string	https://www.opentable.com/gaucho-piccadilly	Any opentable link to a restaurant
color	string	#ffffff	Any color hexa code
color_hover	string	#ddd	Any color hexa code
bg_color	string	#DA3743	Any color hexa code
bg_color_hover	string	Search Now	Any color hexa code
submit_button_label	string	Find a Time	Any text
heading	string	Make a reservation	Any text
select <i>(if the select is set to action_url, then only fill in your restaurant link)</i>	string	Action URL	action_url action_id

How to Import Demo Data

We also offer a way to start your Opentable Forms by importing our [live demo page](#) into your Elementor based website. To do this, please follow the next steps:

1. Login to your WordPress
 2. Go to Dashboard > Tools > Import > WordPress
 3. Import the xml provided into the downloaded package from codecanyon in **plugin_package/demo-data/content.xml**
